|-----------------------------------|--------------------|--------------------------------------|-----------|
| Sri Eshwar College of Engineering | <b>B.Tech CSBS</b> | CGPA Upto (2 <sup>nd</sup> Sem): 7.4 | 2024–2028 |
| Vani Vidyala Matriculation HSS    | <b>HSC</b>         | 90.8%                                | 2023–2024 |
| Vani Vidyala Matriculation HSS    | <b>SSLC</b>        | 93.4%                                | 2021–2022 |

## TECHNICAL PROJECTS

### AI-powered predictive failure detection

[github](#)

2025

Developed an AI-powered predictive failure detection application to identify and classify potential hardware or component malfunctions before complete breakdown using computer vision. Implemented features such as real-time image analysis, YOLO-based anomaly detection, ML model integration, RESTful APIs, and an interactive dashboard for monitoring and alert visualization. Designed a scalable infrastructure and a user-friendly interface for efficient fault tracking and early warning.

**Tech Stack:** Python, YOLOv8, Node.js, Next.js, React, HTML, CSS, JavaScript, Docker

### TravelZen – Full Stack Travel Booking Web Application

[github](#)

2026

Developed a full-stack travel booking website to help users explore travel packages and make bookings online. Implemented secure user authentication using JWT and created responsive UIs for seamless access across devices. Designed RESTful APIs for managing users, bookings, and packages, while integrating MongoDB for efficient data storage and role-based access control.

**Tech Stack:** MongoDB, Express.js, React.js, Node.js, JWT

### AgriSense – AI-Powered Agricultural Decision Intelligence Platform

[github](#)

2026

Developed an AI-based agricultural mobile application for crop recommendation, plant disease detection, weather analysis, water monitoring, and market prediction using Flutter, Node.js, TensorFlow, PlantNet API, and Gemini AI to support smart and sustainable farming.

**Tech Stack:** Flutter, Node.js, TensorFlow, Gemini AI, PlantNet API

## INTERNSHIP

### MERN Intern (2025) | Server Sense – Server Health Monitoring System

[github](#)

2025

Developed a Server Health Monitoring System to track performance metrics such as CPU usage, memory utilization, and server uptime through a centralized dashboard. Built responsive frontend interfaces using **React, Tailwind CSS, and JavaScript** to display monitoring data with clear visual indicators. Implemented backend services using **Node.js and Express.js** to handle data processing and API communication, with monitoring data stored in **MongoDB Atlas**. Deployed the application on **AWS** to enable scalable, real-time server health monitoring.

## CERTIFICATIONS

|                                     |       |      |
|-------------------------------------|-------|------|
| Python from Zero to Hero            | Udemy | 2025 |
| Cloud Computing                     | Wipro | 2025 |
| Complete C & C++ Programming Course | Udemy | 2025 |
| NPTEL Design Thinking: A Primer     | NPTEL | 2026 |
| Java Bootcamp from Zero to Hero     | Udemy | 2025 |

## ACHIEVEMENTS & CODING PROFILES

[LeetCode](#)

– Solved 130+ Problems

[SkillRack](#)

– Solved 730+ Problems

[CodeChef](#)

– Solved 40+ Problems

Participated in Freshathon at **Sri Eshwar College of Engineering**

2025

Participated in **SIH Hackathon**

2025

**FixForward Ideathon 2026 by Hyrup** – Secured Top 300 Team Position in Round 1

2026

**NPTEL Design Thinking: A Primer – Elite (71%)**

2026

## SKILLS

**Programming Languages** : C | Python | C++ | Java | SQL

**Core Concepts** : DSA | OOP

**Web Technologies** : HTML | CSS | JavaScript | Spring Boot

**Database** : MongoDB | PostgreSQL | MySQL

**Tools / Platform** : VSCode | Canva | PowerPoint | Postman | MySQL Workbench | Hugging Face | Kaggle | Colab
